SYNTHETIC FILAMENTS / NATURAL BRISTLE MIXTURE

Historically, natural bristle has been the only fill material used in paint brush manufacture, due to its tapered-profile and rough surface finish enabling good paint pick-up and retention.

However, with the advent of more environment-friendly water based paints, and at time limited bristle supply, Star*GiL

manufacturers are looking to synthetic alternatives.

Synthetic filaments do not absorb water; accordingly stiffness is unaffected by water; which makes them more suitable for

water-based paints. Flagged and tapered tips increase paint pick-up and help to eliminate brush marks. Filaments of variable lengths enable smooth paint flow, by carrying paint in the middle of the brush as well as the tip.

By blending synthetic filaments with natural bristles; perfectly covers the brush performance requirements such as excellent strength, good paint pick-up & supert application. Mixed bristle brushes can also be used with many different types of paints.

NATURAL BRISTLES

Natural bristles, which are the very strong pig hair; are classified according to their origin and colors.

The conical and slightly curved structure of bristle provides extra strength and flexibility.

With its naturally split tips, the bristle picks up and holds the paint well. The bristle gains additional paint pickup capacity and paint release capability from it's somewhat uneven scaly surface and kidney-shaped cross section.

Paint brushes made of Natural bristles are mainly used with oil-based paints, lacquers; high quality enamels and varnishes; for an excellent performance.

We proudly introduce

BİRLEŞİK FİRÇA

as one of the leading paint brush manufacturer of Europe, established in Turkey since 1958.

Today the second generation is the head of the company and their young vision brought novelty to the plant. The production is carried today by the high technology, full automatic machinery under most contemporary conditions. As a synthesis of new mentality and experience of over half century has made BİRLEŞİK FİRÇA one of the most important paint brush supplier for more than 58 countries over 5 continents. Our focus is paint applicators yet mainly the paint brushes. We are manufacturing almost all kinds of paint brushes such as flat, round, oval and rectangular (stain) as well as paint rollers. On the other hand we manufacture tailor-made brushes based on customer's specifications.

Producing all plastic parts and ferrules in our own plant by full automatic machinery with 130 team members, provides stability on quality and flexibility on prices.

BİRLEŞİK FİRÇA is following novelties closely and very sensitive as well for today's and future demands. Consequently, in the light of increasing demand for paint brushes suitable for environmental paints; BFS has included a full automatic, high capacity mixing and bundling machine to the plant. Blending the synthetic filaments and natural

bristles on plant; gives BFS the advantage of competitiveness, stable quality.

In relation with our aim to be the most contemporary paint brush producers; we constantly invest on full automatic Machinery Lines L improvement of new products. We are now one of the biggest paint brush manufacturer in Europe producing paint brushes A to Z. in fully integrated high tech plant. Our goal is to be known as 'THE SPECIALIST' for paint brushes throughout the world and our team is working with this enthusiasm.

Finally, we as BİRLEŞİK FİRÇA Team would like to thank each of our valued customers and business partners for their loyalty and trust, whom are the most precious part of our proud...

DEMİR. M. ALTINDAG
General Manager
